The Soviet formula

This article provides an overview of the ways in which Soviet socialist education appeared in Hungarian pedagogy. It also gives an account of the representation of Soviet education in the leading educational press of Hungary, directed by the communist party.

Mária Laczkó

Performance in reading comprehension according to text types

This article examines the effect of text type on reading comprehension performance. It aims to establish how semantic and syntactic features of various common text types and text structures influence achievements in comprehension.

Attila Varga

Students' attitudes to the environment

This article is based on an investigation, conducted by the National Institute for Public Education, into environmental education. It reports results for students' attitudes to the environment.
