

szereti a könnyed mesét, mint az idősebbek által preferált épületes irodalmat (341-46).

Az irodalom továbbélésének, s talán a vele együtt élő faj túlélésének kulcsa az lehet, hogy mi és utódaink fenntartsuk azokat a kulturális hagyományokat, amelyek ked-

veznek a képzeletbeli világalkotás együttműködő játéknak. Különösen segítenünk kell a kellően eltérő virtuális világok alakítását, hogy közülük legalább egyesek az életet segítsenek bizonyuljanak az emberi természet és a kultúrák koevolúciójában.
