Summaries

BARTON, D.: Business information services in the United Kingdom 167

In the United Kingdom there is an efficient system of business information supply operating. The library system takes an active part in producing and providing related information. The study discusses the mechanism of and the library system's participation in business information provision. In addition to the services of the British Library's Business & IP Centre the article deals with initiatives in rural libraries, which are characterised by a strong business approach, and focus on business- and economy-related information resources for small and medium-sized enterprises in the regions concerned.

KOLTAY, K.: What's the news around MOKKA-ODR? The National Periodicals Database as part of MOKKA-ODR services 185

The integration of the National Periodicals Database (NPA) with MOKKA-ODR services had a triple purpose: 1. to make the holdings data of periodicals available for the users of document supply services; 2. to provide an opportunity for libraries to report their holdings data online, based on the data transfer mechanisms and registries of MOKKA-ODR; and 3. to put the revision of data reported in earlier periods into the hands of holding libraries.
