EAGE NSG 2026

(European Association of Geoscientists and Engineers – Near Surface Geoscience Conference & Exhibition 2026)

Dear Friends,

In order your visit in Greece and participation in EAGE NSG 2026 to be as better as it can be, there will be a field trip organized by HGU to its friends/colleagues with the lowest cost as it was organized in parallel with EAGE NSG 2014 in Athens to Santorini Island.

I send you the first information in the case you are interested and in the near future its final cost.

Best regards

George

* * *

PS1. Consider the case of EAGE PACE support in the case you have presentations in EAGE NSG 2026.

PS2. Also consider the case of group registration with lower EAGE fee

Dr. George Apostolopoulos
Professor in Applied Geophysics
Director of the Laboratory

National Technical University of Athens
School of Mining and Metallurgical Engineering
Section of Mining Engineering
Laboratory of Hydrocarbon's Exploitation & Applied Geophysics
