DOI: [10.1556/2060.103.2016.3.1](https://doi.org/10.1556/2060.103.2016.3.1)

On page 386, the equation in the third line under Fig. 6 should read:

$$\Delta\text{HCO}_3^- = 1.125 - 0.34[\exp(\text{fraction of } \text{VO}_2\text{max}/0.2915)]$$

The “ Δ ” indicates “change in HCO_3^- ” and “fraction” should replace “percent” to obtain the correct result. This computed quantity for ΔHCO_3^- will be negative when the fraction of VO_2max exceeds 0.35. Absolute HCO_3^- is obtained by adding ΔHCO_3^- to 24 mmol/L.

An abbreviation should have been inserted in the list as:

ΔHCO_3^- = change in concentration of bicarbonate ions in blood (mmol/L)
