

## SUMMARY

### **LABÁDI Lajos: The History of Redemption in Szentes (1836/37)**

labadil@szentes.hu

See the resume at the end of the article.

### **LABÁDI Lajos: The Life of Seress László (1803–1872) Surveyor-Engineer**

The contract about its redemption with the landlord made it necessary to employ a land-surveyor engineer permanently in Szentes. SERESS László engineer was employed who was born in a noble family in Nyitra County. He was hired by the town between 1837 and 1843. He had completed a great deal of work, however for several reasons his employment was terminated.

### **LABÁDI Lajos: The Preparation of the First Detailed Cadastral Map of Szentes (1837–1840)**

See the resume at the end of the article.

### **TÁNCZOS Roland: Remembrance of Rózsa Gábor Engineer-museologist**

tanczos.roland@mnl.gov.hu

Although RÓZSA Gábor had started his career as an engineer, his devotion to the treasures of the past led him to the County Museum. He was collecting the records of the past as an employee of the József Koszta Museum from 1983. The collection and description of the maps of Csongrád County was his true legacy. He researched the artists, craftsmen and cavalymen. He read lectures, wrote publications and had exhibitions about his results to the public.

### **SCHMIDT Anikó: The Concretual Survey of Szentes**

schmidt.aniko@mnl.gov.hu

The cadastral units ('Flurs') and the agricultural branches can be studied on the documents of the concretual survey of Szentes made between 1852 and 1854. The detailed survey started in 1882, the documents prepared during the temporary cadastral units survey had been used till then, the changes of the coming decades were documented in these papers. The maps and the documents serve as excellent sources about the economy and local history of Szentes.

### **TÖRÖK Enikő: The Detailed Survey of Szentes**

torok.eniko@mnl.gov.hu

The detailed survey of Szentes was completed upon the instruction in 1869. We know only a part of these documents, which can be found in four different institutes. After the triangulation and preparation (1881) the survey was completed in 1882, and the preparation of the written documents, and the cadastral maps were made in 1883. More than 30 cadastral employees (inspector, engineer, assistant, cadastral trainee, clerk) participated in the work.

### **ZÁVOCZKI Adrienn: The Cadastral Engineers of Szentes**

zavoczki.adrienn@mnl.gov.hu

Due to the huge area where Szentes lies more engineers participated in the cadastral work than usual. Only one of them, István Berczeli was born in the town. About 37 engineers participated in the survey of the settlement for some period besides him.

### **FILEP Antal: Landscape, Settlement and Land-Use on the Map of Szentes in 1840**
